DATA ENGINEER

3+ Years Experience | PySpark | AWS | Big Data | Distributed Systems

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience building scalable data pipelines and distributed data systems using PySpark, AWS, and Snowflake. Processed 50GB+ daily data workloads and reduced pipeline costs by 25% through optimization. Strong expertise in ETL design, data modeling, and data quality in financial systems.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Java
Data Engineering: ETL Pipelines, Data Modeling, CDC, Batch Processing, Data Warehousing
Big Data: Hadoop, Hive, Spark, Databricks, Snowflake, dbt (Data Build Tool)
Cloud: AWS (Glue, Lambda, S3, Athena, Step Functions, EventBridge, Lake Formation), Azure
Tools: Apache Airflow, Git (GitHub, GitLab), Jenkins, Alation

PROFESSIONAL EXPERIENCE

Data Engineer — Barclays July 2023 – Present

- Owned and built ETL **data pipelines** processing **50GB+ daily data** using PySpark & AWS
- Reduced data processing costs by **25%** through optimization
- Designed and implemented **CDC pipelines** using Airflow and EventBridge
- Migrated large-scale data systems from **Teradata to Hadoop/Spark**
- Converted **BTEQ-SQL workflows into PySpark pipelines**
- Developed frameworks for **data validation and schema evolution**
- Implemented **data quality checks**, improving reliability
- Led **data reconciliation processes** during migrations
- Collaborated with data and business teams to deliver production-grade pipelines

KEY PROJECTS

Real-Time Data Pipeline (AWS + Spark Streaming)

- Built streaming pipeline ingesting real-time data using AWS and Spark
- Processed and stored large-scale structured data in S3 with optimized transformations
- Designed scalable architecture for high-throughput data ingestion

Data Migration & Reconciliation Framework

- Developed automated framework for validating data consistency across systems
- Compared large-scale datasets between Teradata and Hadoop environments
- Reduced manual validation effort and improved migration accuracy

ACHIEVEMENTS

- Promoted to **BA4 (Associate Level)** within 2 years based on performance
- Nominated for **Emerging Star Award (2025)** for strong project contributions

EDUCATION

B.E Computer Science and Engineering — Anna University | CGPA: 8.8/10 | May 2023
Higher Secondary (Computer Science) — Tamil Nadu State Board | 1170/1200 | May 2018

CERTIFICATIONS

- Snowflake Hands-on Essentials (5 Badges)
- Databricks Fundamentals Certification
